

2nd Sprint Assignment - Analytical Literature Review

Write a **5–7 page analytical literature review** that critically examines sources relevant to your project and explains how they reshape, clarify, or challenge your original proposal.

You may use any credible source type, including:

- Academic articles and books
- Technical documentation
- Standards
- Industry reports
- Reputable journalism
- Public talks
- Software repositories
- Blogs (if substantive and attributable)

All sources must be fully and consistently cited.

Required Structure

1. Project Context (Connection to Sprint 1)

Briefly restate:

- Your project title
- Your refined problem statement
- Any adjustments since Sprint 1

If your focus changed, explain why.

2. Search Strategy

Explain:

- Where you searched
- What search terms you used
- How you selected sources
- How many sources you reviewed
- How many you included

Your process should be transparent and reproducible.

3. Thematic Analysis (Core Section)

Organize your sources by themes, debates, approaches, or schools of thought.

Do not summarize paper-by-paper.

For each theme:

- What claims or positions appear?
- What evidence is used?
- Where do sources agree?
- Where do they conflict?
- What limitations or assumptions are visible?
- Demonstrate synthesis and comparison.

4. Gaps, Tensions, and Open Questions

Identify:

- Underexplored aspects
- Conceptual confusion
- Weak assumptions
- Methodological limitations
- Missing perspectives

Be precise and justified.

5. Implications for Your Project

Return explicitly to your Sprint 1 elements:

- Does your problem definition need refinement?
- Do your constraints change?
- Are your goals realistic?
- Do your metrics still make sense?
- Are new non-goals necessary?
- Explain how this review alters your next steps.

6. Use of AI Tools (Required)

Include a short section titled:

“Use of AI Tools.”

Specify:

- Which tools you used
- For what purpose
- What you independently verified
- What analytical decisions were your own

If you did not use AI, state that explicitly.

Failure to disclose AI use is a course policy violation.

Minimum Expectations

- 8–12 substantive sources
 - Clear and consistent citation style
 - Evidence of synthesis and critical judgment
 - Explicit connection to your Sprint 1 proposal
-

Submission

Create a Google Docs file with:

- Clear section headings
- Your name
- Date
- Project title

Upload it to your GDrive project folder in a new sub-folder:

2nd Sprint Review

Ensure the folder is shared with Lyon College and submit the folder link in Canvas.

This sprint is intended to move you from “having an idea” to understanding the intellectual and practical landscape in which your project exists.
